

RUSSIANS HOLD THE MOUNTAIN RANGE

CONTROL THE CRESTS AND MOST PASSES OF THE CARPATHIANS

MAKE FUN OF THE GERMAN REPORT THAT THE CAMPAIGN HAS SO FAR COST THEM HALF A MILLION MEN

Petrograd, April 19.—With the first phase of the Russian campaign in the Carpathians ended by weather conditions, the Russians are strengthening their positions in the mountain ranges. Minor successes for the Russians in the vicinity of Rostoki and southwest of Czernowitz are reported. The Russians have again crossed the Dneister, making a drive toward Jaklonica pass.

The German claim that the Russians lost half a million men in the Carpathian campaign and were defeated is emphatically denied at the war office.

SMASHUP ON THE SEABOARD

Entire Traffic on the Division Stopped Eleven Hours by Accident in Ocala

All traffic on the Seaboard railroad through Ocala was held up Saturday night and Sunday morning till 11 a. m.

About midnight Saturday night, while two long freight trains were passing each other on the long siding between the Exposition street crossing and the S. A. L. freight yards, the southbound train struck a broken rail and two heavy, steel-framed cars, loaded with coal, left the track and dug deeply into the sand. The corner of one as it was tilted over sideswiped a refrigerator car loaded with celery on the northbound train of perishable freight and literally bent that car more than 15 inches after tearing off most of the outer planking. Everything was held up and the wrecking crew and train sent for. The northbound passenger laid out at Santos and the southbound in the yards at Ocala. The two freights at the point of the collision as well as others which arrived all up and down the road were standing on sidings and main line, wherever space could be found.

Word was passed that the wreck had occurred and a big crowd gathered to watch the operations of clearing it. The wrecking train did not get to work until 9 o'clock, but had the track clear in two hours. It was an interesting sight to watch the huge crane or derrick lift the 60-ton load like a man lifts a sack of corn.

Strange to say, neither the coal cars or the refrigerator car were put out of commission and all were able to proceed without unloading, though the car of celery will probably be loaded into another car and re-iced at Jacksonville.

The broken rail not only broke in two, but while the wheels of the heavy train were passing over it, the broken pieces snapped like the stem of a clay pipe, till there were four of the broken pieces from a foot to four feet in length, the steel rail apparently having crystallized.
